LEARNING OUTCOMES

- Learn to apply design thinking fundamentals to ensure that a solution is desirable from a human point of view

- Develop an understanding of the full design process from inspiration to implementation and learn to transform an idea into an innovative product or service

- Learn how design thinking is used to conceive innovative business models and forecast trends and developments

THE DTRAIN PROJECT

The DTRaIN Project, objective is to revitalize the production in the agri-food sector of partners regions, by promoting the acquisition of high-quality skills for managing staff and entrepreneurs working in the sector.

To address this objective, a European "Design Thinking" professional profile will be developed, based on a qualification scheme for validating learning outcomes, according to ECVET recommendations.

PROJECT OBJECTIVES

Design a VET Curriculum and develop training content (EQF 4-5) for entrepreneurs in the agri-food sector, based in Design Thinking methodology.

Design an innovative educational model based on a learner-centered approach, in a flipped classroom ubiquitous environment.

WHO IS IT FOR?

Trainers, Vet Institutes, Professionals in the Agri-food sector

DURATION

Self-paced, ubiquitous learning on the DTRaIN Online platform. The indicative duration of the training is two weeks.

5 TRAINING MODULES

Module 1: Pre steps in Design Thinking

Module 2: Observation

Module 3: Ideation

Module 4: Prototyping

Module 5: Testing

VIDEO LESSONS

On demand, on the project's YouTube Channel and on the Learning Platform.
